

C.I. Agent (Loose Granules/Dissolvable Film Pack)

Loose Granules

Dissolvable Film Packs

5 Gallon Pail

PRODUCT DESCRIPTION:

C.I. Agent is a proprietary blend of USDA food grade polymers that is non-toxic, non-corrosive, non-carcinogenic, and non-hazardous. C.I. Agent is listed on the EPA National Contingency Plan Product Schedule as a "Solidifier" for use on oil spills in the navigable waters of the United States. C.I. Agent polymers have a long chain molecular structure that is highly cross-linking with organic liquid hydrocarbons, enabling C.I. Agent to solidify liquid hydrocarbons (sheen, gasoline, diesel, and oils, including crudes) upon contact into an inert solid rubber-like mass that floats.

PRODUCT APPLICATIONS:

C.I. Agent can be used in loose granule form, dissolvable film packs, pillows, booms, and hydrocarbon flow filters. C.I. Agent can be effectively used for both spill prevention and clean up. As a spill prevention tool, C.I. Agent has become the engineered solution for the electric utility industry for SPCC secondary containment and for oil contamination removal in underground vaults and manholes. C.I. Agent Hydrocarbon Flow Filters, storm drain inserts, and sheen bags can remove hydrocarbons from water to levels below 5ppm without impeding the flow of water. C.I. Agent can solidify and remove liquid hydrocarbons (sheen, gasoline, diesel, and oils, including crudes) from both fresh and salt water without processing any water.

PERFORMANCE SPECIFICATIONS:

Solidification rate by weight; 4 parts contaminant to 1 part C.I. Agent Granules; indefinite shelf life.

BENEFITS:

- Solidifies all organic hydrocarbons.
- Works in both fresh and salt water.
- Has no temperature limitations; extreme heat and cold.
- No expensive mechanical equipment required for recovery.
- Cannot sink.
- Renders hydrocarbons into a non-hazardous inert solid rubber-like mass.
- Can be disposed of in most landfills, eliminating the "Cradle to Grave Liability" and fees associated with hazardous waste disposal.
- Can be 100% recycled as raw material for asphalt, rubber and plastic production, or can be burned as fuel.

AVAILABILITY:

C.I. Agent is available in loose granule form and in dissolvable film packs in standard quantities packaged by weight: 10 lb., 50 lb., 100 lb., 200 lb., 400 lb., and 800 lb. units. Granules are available in 30 gal., 55 gal., and 95 gal. over packs. C.I. Agent dissolvable film packs are available in 4 oz., 8 oz., and 16 oz. packets.
